FLEXITOL CUTICLE & NAIL CREAM

THE 4 IN 1 SOLUTION TO RESTORE HEALTHY
CUTICLES AND NAILS

BEFORE

- DRY RAGGED EDGE
- CRACKED CUTICLE
- HANG NAIL

AFTER

- SMOOTH & MOISTURISED EDGE
- CONDITIONED CUTICLE
- REPAIRED CUTICLE

PRODUCT INFORMATION

INDICATIONS:

With its extra rich emollient and moisturizing properties, Flexitol Cuticle & Nail Cream makes it easy to condition cuticles and smooth away dry, ragged edges. Helps to reduce hang-nails, promote nail growth and keep cuticles soft and pliant. Excellent for split fingers.

PRECAUTIONS:

For external use only. Avoid contact with eyes. Keep out of reach of children. Always replace cap after use. Do not use if tube seal is broken or appears tampered with. Discontinue use if local irritation or rash occurs during use.

STORAGE INSTRUCTIONS:

Store between 10°- 30° C in a dry place.

DOSAGE AND DIRECTIONS FOR USE:

Massage into cuticles and base of nails daily. For a special treatment apply Flexitol Cuticle & Nail Cream generously to fingers and toes. Massage in well. Soak in warm water for two minutes and remove excess cream. Discontinue use if local irritation or rash occurs during use.

HOW DOES FLEXITOL CUTICLE & NAIL CREAM WORK?

UREA (6%)

Removes dead skin cells, enhances accessibility to underlying skin allowing required actions to take place. As a humectants, urea improves the degree of hydration in the skin by increasing the water uptake from the dermis level of the skin and enhances the stratum corneum water binding capacity. Additionally, urea has been reported to reduce/ prevent trans epidermal water loss (TEWL) and increases skin capacitance.

LACTIC ACID & SODIUM LACTATE

It also contains optimum blend of natural AHA (Lactic acid & sodium lactate) which promotes topical cell renewal and thus promote nail growth.

EMOLLIENTS

Once Urea has penetrated the hard skin, emollients such as Lanolin, Glyceryl stearate and Decyl Oleate penetrate underlying skin, creating lasting softness and smoothness. Lanolin is an extremely effective emollient in restoring and maintaining the moisture balance of the stratum corneum, and so prevents drying of the skin

DIMETHICONE

It is a silicone based emollient that also acts as a protective barrier to dry skin. It treats and prevents dry, itchy skin or minor skin irritations.

Smooths dry
and ragged edges

Repairs cracked cuticle

Repairs hang nail

Promotes nail growth
and protect from further
infection
